

TAG TrustNet LLD Register

Q1 2026

The TAG TrustNet Log-Level Data (LLD) Register provides information on the access and availability of LLD feeds to advertisers provided by the main intermediaries part of the programmatic advertising supply chain. The LLD Register is updated and published quarterly as a resource for general information.

Definitions

CFT: TAG Certified for Transparency

TTN: TAG TrustNet Data Connector

Rating	Log-level Data Supported	Required Data Fields
	Yes	Available
	In Development	Partially Available
	No	Not Available

Log-Level Data Supported: The supplier provides access to an always-on impression LLD feed to all advertisers and their agencies, as specified in the [TAG Certified for Transparency Guidelines](#).

Required Data Fields: The impression LLD feed provided by the supplier includes the data fields and the related data specified in the [TAG TrustNet Requirements](#).

In Review: In active review.

Unknown: It is unknown whether the vendor supports LLD, or it requires initial review and further evaluation before a classification of providing the required LLD fields can be determined.

Transparency Requirements

TAG TrustNet (www.tagtrust.net) was launched jointly by TAG (www.tagtoday.net) and Fiducia (www.fiducia.eco), provider of the LLD management platform, as the major industry initiative to create a single transparent, fair, and responsible programmatic marketplace based on data symmetry.

Data symmetry can become a reality if suppliers comply with some minimum requirements:

- Verification and Identification:** All participants need to be verified as legitimate legal entities and always identifiable over an ID provided by a recognized industry trade association.
- Data Access:** All suppliers need to make a contractual commitment to provide ongoing access to impression LLD to any advertiser or publisher asking for it.

- Data Fields:** The LLD provided by the supplier needs to comply with specified data fields, including quantitative, qualitative, and financial information.
- Matching IDs:** The impression LLD needs to include an ID (as defined by oRTB standards) to deterministically match impression LLD across suppliers.
- Data Matching:** All parties involved in a transaction need to use an independent platform recognized by industry trade associations. This platform needs to act as a utility connecting, harmonizing, and reconciling impression LLD across the parties to come up with a unified record for every single impression, recognized by all parties as "shared truth." Authorized parties need to have the option to export and share the reconciled data over the platform for their internal use and with their authorized business partners.
